

Product Data Sheet

# GUARDIAN UV-C 36W

UV-C lamps emitting ultraviolet light are one of the most effective devices capable of removing viruses, bacteria, fungi from the surface or destroying the DNA or RNA of any exposed microorganisms. It is enough to direct the UV lamp directly onto the surface for a specified time to effectively kill microorganisms. They are so powerful that they may produce harmful effects on human skin or eyes. Therefore, basic safety precautions should be observed when using UV-C lamps for disinfection, i.e. you should not stay within the range of the light beam.

- Type of light: UV-C ultraviolet
- Body colour: white
- Disinfection efficiency: about 15 m<sup>2</sup>
- Lifespan: 8000 h
- Supply voltage: 220-240 V
- Ingress protection IP 20
- Power supply cable 5 m
- Ergonomic movable handle
- Available option: ON-OFF switch
- Universal mounting strap in set
- Adapted for mounting on a universal tripod
- Dimensions (A/B/C) [mm]: 215/320/9

Lamps with power 36W will disinfect a space of about 15m<sup>2</sup>. There are recommended for use in healthcare facilities, grocery stores, public and private means of transport, at petrol stations, in courier companies, public administration and educational establishments and at private homes and cars. Depending on the distance from the light source, temperature and humidity, we take 15 minutes as an approximate disinfection time.

## Product Data Sheet

# GUARDIAN UV-C 36W

### Standard accessory

#### Universal Strap

Mounting without tools

Available in set with lamp

### Additional accessory

#### Universal tripod

Mounting without tools

Part No. AM0720

### Available lamp models:

Power (W)	Lifespan of UV-C source (h)	Plug	Cable length	Protection class	Supply voltage	Weight	Part No.
36	8000	UK 13A Plug	5m	II	220-240 V	2.2	AMG36
